Forecast for Saturday 11 Nov 2023

Weather: Once early patchy mist, fog and any low cloud clears then a mainly dry and sunny day is expected. Clear spells at first this evening, then possibly becoming cloudy later.

Chance of cloud-free hill tops above 600m: 60% rising to 95%, as mist and fog clears.

Low Cloud and visibility: Poor visibility at low level in mist and fog but likely good visibility towards the higher tops. Patchy low cloud is possible above 300m at first, this lifting and breaking this morning, which along with mist and fog may shroud summits at times. By late morning very little low cloud is expected with far reaching views likely throughout today. Mist and fog patches are likely to reform this evening.

Forecast for Sunday 12 Nov 2023

Weather: A cold morning with some mist and fog patches likely initially. Cloud will quickly increase from the west, with rain arriving by early afternoon. Rain may be heavy for at times in the afternoon before clearing late evening, although a few showers could follow.

Maximum wind: Southeast 20 mph gusts 35mph.

Chance of cloud-free hill tops above 600m: 90% falling to 60% by late afternoon, low cloud associated with rain.

Low Cloud and visibility: Mainly clear during the morning, although where mist and fog patches have formed visibility will be poor for a time early in the morning. During the afternoon areas of low cloud above 500m will spread east with moderate or poor visibility at times in the rain.

Temperature: **Valleys:** Plus 1 rising to 7 Celsius.
At 600m: Plus 2 or 3 Celsius.
Freezing level: 800m rising to 1200m
